PERSONAL PROFILE

I am a front-end web developer experienced in developing performant websites using semantic HTML and scalable CSS. I'm always evaluating and upgrading my skills so I can stay on top of the current technologies/trends.

Above everything else I have learnt that performance is key for driving quality content and user retention for my end users. I always strive to develop faster and cleaner written websites and have a good working knowledge of WordPress, with the ability to create custom themes to specification.

I've also taken a keen interest in learning all about accessibility, as I believe it's important to make sure everyone can use the internet.

I've followed through with the design and the development of various freelance opportunities for clients to further their online visibility.

Right now I'm looking for a company where I can work alongside similar minded developers and help me grow as a web developer.

KEY SKILLS

HTML (5)	CSS (3)	Jquery	Javascript	WordPress
Sass	Gulp	GitHub	Photoshop	Responsive Web Design
Cross browser compatibility	SEO	Sketch		

EMPLOYMENT HISTORY

Two Heads Design (Web Developer) June 2016 – Present

I'm the sole Web Developer responsible for developing and designing websites using the best and most up to date practices and techniques. When writing the CSS I've adopted a component based technique. The benefit to this is no component is tied to the template or page, so it can be reused across the website. In addition to the component based technique, I use BEM naming convention for all the classes to make it easy to understand how each element relates to the parent and one another. Other than the responsibility of developing and maintaining websites, I also manage the Two Heads servers and client hosting. These responsibilities make me the first point of contact for any client issues or requests, which are dealt with in a quick and professional manner.

TAL Insurance Sydney (Scanning Administrator) June-July 2015

As a temporary member of staff employed for the end of the financial year, I aided with the smooth transition in what is the busiest period of the year for the business. Our department had a huge workflow for the duration of the six weeks of my employment, but with my help and often working 50 hour weeks, we managed to ensure the smooth processing of the vast multitude of incoming claims, thus in keeping with the company's 48 hour turnaround policy.

My main responsibilities included processing incoming paperwork to be sorted and sent to other departments, this required a very high level of care and detail to make sure no mistakes were made with sensitive and confidential information.

Hull City Council Social Services, Service Support Assistant (February 2014-May 2015)

My main duties within this role was to be the first point of contact for clients and professionals, whether this be face to face or over the telephone dealing with the queries and problems they faced. I always operated within strict data protection laws whilst handling sensitive information. On top of my main duties I was also responsible of maintaining a filing system also archiving old files to be sent off site.

Another duty was to record all money transactions in and out of the work place for audit purposes. I also claimed back VAT on receipts and process invoices, I also recorded minutes for professional meetings within the social services that would be placed on record.

EDUCATION

LEEDS METROPOLITAN UNIVERSITY
BSc Games Development Upper Second Class Honours (2:1)
